1 Professional history

Current professional status

Position: Senior Research Scientist since January 2020 (DR1 Inria, \approx research full professor, with tenure)

Institution: Inria, Lyon, France.

Previous professional experiences

Start	End	Institutions	Positions and status
09/2013	12/2019	Inria Lyon	Directeur de Recherche Inria (DR2)
10/2009	09/2013	Inria Lyon	Chargé de Recherche Inria (CR1)
09/2006	09/2009	Inria Saclay	Chargé de Recherche Inria (CR1)
09/2004	08/2006	Inria Saclay	Détachement Inria
09/2000	08/2004	Univ. Cergy-Pontoise, Life Sci Dept	Maître de Conférences
09/1999	08/2000	Univ. Cergy-Pontoise, Life Sci Dept	A.T.E.R.
09/1996	08/1999	Univ. Technology of Compiègne	PhD Student (MESR grant)

Major organizational activities

- **Co-head of AIstroSight** (2023-today), a joint research team between Inria, Hospices Civils de Lyon (Lyon University Hospital), Université Claude Bernard Lyon 1 and Theranexus, a biotech company <https://team.inria.fr/aistrosight/>
- **Deputy Scientific Director** of Inria for "Digital Health and Biology" (2018-2023). My mission was to advise Inria's scientific director regarding our research on the application of numerical sciences (applied mathematics, computer science, artificial intelligence) to biology or health. In particular, this consisted of : being the main contact point between the field of biology and health outside Inria and our research teams, monitoring and managing the life cycle of our research teams in the domain, helping to define our research strategy in digital biology and health and how to implement it; managing governmental research programs led or co-led by Inria.
- **INSERM committee for health technologies** (2022-today): appointed member of the 7th specialized scientific board (CSS7) of Inserm, the French National Institute for biomedical research and human health. CSS7 assists Inserm senior management for the hiring or promotion of its researchers and the evaluation of its research teams regarding health technologies.
- **Elaboration of the PEPR Digital Health** (2021). The PEPR Digital Health is the national program of the French government to fund research in digital health for 2022-2030. Its elaboration and steering is a joint action of Inria and Inserm. I have been one of the two Inria co-supervisors of its elaboration.
- **Comité d'Expertise et Scientifique pour les Recherches, les Etudes et les Evaluations dans le domaine de la Santé** (CESREES)(2020-today) - appointed member. The mission of

the CESREES is to examine the public interest, the ethical and scientific quality of requests for access to french public health data.

- **Taskforce Inria Covid-19** Chargé de mission and co-supervisor of the taskforce (2020-2021). This taskforce has coordinated the mobilization of Inria's resources in close collaboration with all ministerial and governmental initiatives to mobilize Inria's resources for the short-term fight against the virus.
- **Associate Editor** for PLoS Computational Biology (2018-today)
- **Vice-Chair** of Inria's "Evaluation Committee" (Commission d'Evaluation) (Oct. 2016- Feb. 2018). The goal of Inria's Evaluation Committee is to assess the calibre of research conducted at Inria and guarantee the quality of its hiring and internal promotions.

2 Diplomas

Habilitation à diriger des recherches (Habilitation Thesis)

"Modeling Complex Biological Systems: Examples in Computational Cell Biology, Computational Neuroscience and applications to Computer Science"

Date of the defense : June 2008

Granting institution : Ecole Doctorale d'Informatique - University of Orsay Paris-Sud - Orsay

Jury: *F. Alexandre* (Project-team Cortex, Inria, Nancy, France, Rapporteur), *E. Ben Jacob* (School of Physics and Astronomy, Tel Aviv University, Israel, Rapporteur), *K. Burrage* (Computation Laboratory, University of Oxford, Oxford, UK and Institute for Molecular Biology, University of Queensland, Brisbane, Australia, Rapporteur), *H. de Jong* (Project-Team Helix, Inria Rhône-Alpes, Grenoble, France), *J. Demongeot* (TIMC-IMAG Laboratory, University Joseph Fourier, Grenoble, France), *A. Lesne* (IHES, Bures-sur-Yvette and LPTMC, Univ. P & M. Curie, Paris, France), *O. Temam* (Project-Team Alchemy, Inria Saclay-Île-de-France, France).

Ph.D.

"Gelification et catalyse enzymatique des transitions gel-sol de la fibronectine: Implications dans le Remodelage de la Matrice Extracellulaire et l'Invasion Tumorale."

Date of the defense of the Ph.D. : October 08, 1999

Granting institution : Université de Technologie de Compiègne

Host institution. : UMR 6022 CNRS, Génie Enzymatique et Cellulaire, Univ. Technol. Compiègne and ERRMECe, EA 1391, Université de Cergy-Pontoise.

Supervisor: Pr. V. Larreta-Garde

Other diplomas (Masters and above):

- Master2 ("D.E.A") in Enzyme Technology, Université de Technologie de Compiègne, 1995
- Engineer Diploma in Biotechnology, Université de Technologie de Compiègne, 1994

3 Other synergetic activities

3.1 Other organizational activities

- My activities as Deputy Scientific Director of Inria (2018-2023) have led me to serve in a number of committees, the main ones I list here:
 - Coordination and Steering committees of the Daniel Bernoulli Lab, the joint laboratory between Inria and APHP (Paris university hospitals trust), 2021-
 - Comité Stratégique de Pilotage for the INRAE "DigitBio" metaprogram (<https://www.inrae.fr/nous-connaître/metaprogrammes#digitbio>), 2021-

- Comité de la Recherche en Matière Biomedicale et de Santé Publique (CRBSP) of the "Hospices Civils de Lyon", HCL (Lyon university hospitals trust), 2021-
- Commission Intelligence Artificielle of the HCL, 2021-
- Inria representative at the board of Aviesan, the French National Alliance for Life Sciences and Health (<https://www.aviesan.fr/en>), 2019-
- Comité de la Recherche en Matière Biomedicale et de Santé Publique (CRBSP) of AP-HP, 2019-2021
- Working Group “Catalog of observational studies relevant to health” of IReSP (Institut de Recherche en Santé Publique), 2021
- Monitoring committee of the “Plan France Médecine Génomique 2025”, 2019-2020
- Monitoring committee of the French Health Data Hub (<https://health-data-hub.fr>), member of the “working group on data”, 2018-2020
- Conseiller Scientifique, ITMO Technologies pour la santé (<https://its.aviesan.fr>), 2018-
- Comité d’Orientation Scientifique et Stratégique, Institut Français de Bioinformatique (IFB, <https://www.france-bioinformatique.fr>), 2018-2021
- Selection committee for the “Postes d’accueil de l’AP-HP”, funding sabbatical in research Institutes for Paris area clinicians, 2018-2020
- Comité des Tutelles, Institut Français de Bioinformatique (IFB, <https://www.france-bioinformatique.fr>), 2018-2020
- Comité des Tutelles, France Life Imaging (FLI, <https://www.francelifeimaging.fr>), 2018-
- Comité des Tutelles, France BioImaging (FBI, <https://france-bioimaging.org>), 2018-
- Comité de Pilotage, Action de Recherche Prospective Biologie Predictive INRA (2018)
- Comité de Pilotage et de Programmation, interCPP "Santé Numérique", ANR, 2018-2020
- The HCERES is a french governmental institution tasked with assessing and analysing the quality of higher education and research in France. I have served as an expert for the HCERES evaluation of the following laboratories:
 - Physico-Chimie Curie, UMR CNRS 168, Institut Curie, Paris, 2023
 - CAPS lab (Cognition, Action et Plasticité Sensorimotrice), U1093 INSERM, Dijon, 2023
 - IRSN (Institut de radioprotection et de sûreté nucléaire), program ROSIRIS, Fontenay-aux-Roses, s2016.
- Conseiller Scientifique, ITMO Neurosciences Sciences Cognitives Neurologie Psychiatrie (<https://itneuro.aviesan.fr>), 2020-
- Member of the “Commission des thèses” of the Doctoral School “Info-Maths” (ED 512) that brings together most of the laboratories and researchers in Computer Science and Mathematics in Lyon (2017-2019).
- Vice-Chair of the Search Committee for “Inria Senior Research Scientists” (Vice-Président Jury d’admissibilité DR2) 2017.
- Member of the Steering Committee (comité de pilotage) of GdR IMA BIO (Imagerie et Microscopie pour la BIOlogie, <http://imabio-cnrs.fr>), 2016-2018. This GdR is a federation of the french research groups (> 120 labs) implicated in biophotonics, super-resolution microscopy and related simulation and analysis tools.
- Chair of the Search Committee for “Junior Research Scientists” (Président Jury d’admissibilité CR2) of Inria Grenoble Research Center, for three years 2014, 2015 & 2016.

- Representative for Inria on the Administrative Board (“Conseil d’Administration”) of the RNSC (“Réseau National des Systèmes Complexes”, <http://rns.csregistry.org>), 2016.
- Member of Inria’s “Scientific Board” (Conseil Scientifique), 2014-2016. The Scientific Board plays a role as consultant and expert to assist the Board of Directors.
- Member of Inria’s “Parity-Equality” Committee (2015-2016) (parite.inria.fr/en/). This committee ensures that parity, gender issues and equality have been taken into account within Inria activities.
- Member of several Inria’s Search Committees 2012-today (hiring research scientists, jury d’admissibilité et d’admission, CR2, CR1 and DR2).
- Member of the Science Steering Committee of the Rhône-Alpes Complex Systems Institute (IXXI) 2013-2016 (www.ixxi.fr).
- Member of Inria’s “Evaluation Committee” (2011-2015).
- Member of the SPECIF Committee, that awards each year the Gilles Kahn award, for the best French PhD in Computer Science, 2011-2014.
- Member of the Evaluation committee for the calls for funding “Systems Biology and cancer” of the “ITMO Cancer” (consortium of all the French national research institutes for research against cancer) for years 2012 to 2015.
- Member of the AERES committee for the evaluation of the UR protection radiologique de l’homme, IRSN, 2010. AERES is the National Evaluation Agency that is tasked with evaluating French research and higher education institutions and research organizations.

3.2 Conference Organization

- 1st Singapore-France Joint Workshop on AI in Health, held in association with the international conference MedInfo (<https://medinfo-lyon.org/en/>), Lyon, France, August 27-29, 2019.
- INSERM Workshop “Intracellular dynamics of molecules: analysis and models” (<https://evenium-site.com/pro/fiche/quest.jsp;jsessionid=AtgN5xBbfR3IBZ!4LSac62UL.g12?pg=740486>). The workshop combined a 3-day critical assessment phase (in Bordeaux, France, June 24-26 2019) and a 3-day technical workshop (in Lyon, France, July 1-3 2019). This workshop addressed a biologist audience and covered the main experimental methods to quantify the mobility and trajectories of biomolecules in living cells, with an emphasis on the quantification methods for individual trajectories and the interest of computer simulations for analysis and interpretation.
- Workshop “Dynamiques des molécules et assemblages moléculaires”, Montpellier, France, 4 December 2017.
- Module “Molecular assembling and dynamics: from experimentation to modeling” at the thematic school “Functional Microscopy in Biology” (MiFoBio 2016), Seignosse, France, 30 Sep-07 Oct 2016.
- Minisymposium “Modeling Spatiotemporal Calcium Dynamics” at ECMTB 2016 (10th European Conference on Mathematical and Theoretical Biology), The University of Nottingham, UK, 11-15 July 2016.
- 2-day workshop “Molecule Trajectories in Cellular Spaces: promoting interactions between theoreticians and experimentalists” (traece.inria.fr), Ecole Normale Supérieure de Lyon (France), November 16-17, 2015.

- Organization committee of the bis-annual CNRS thematic school “CompSysBio: Advanced Lecture Course on Computational Systems Biology”, 2015 and 2017 (compsysbio.inria.fr).
- Workshop “Computational Methods and Modeling of Astrocyte Physiology and Neuron-Glia Interactions”, held as part of the conference OCNS (Organization for Computational Neuroscience) 2014 in Quebec, Canada, July 26-31, 2014. see <https://team.inria.fr/beagle/ocns-2014-workshop/>.
- Conference “Mathematical modeling in cell biology” in Lyon, March 25-29, 2013 (mathbio2013.sciencesconf.org/resource/page?id=3),
- Organization committee of the annual CNRS-INRA thematic school “**EIEFB**: Ecole interdisciplinaire d’échanges et de formation en biologie”, 2010-2017 (projects.inria.fr/berder2017).
- Autumn School/Conference, NeuroComp 2007 on Computational Neurosciences, 14-16 November, Paris (www.neurocomp.fr/2007.html).

3.3 Other committees

- Search committees (committees to hire professors / assistant professors): Since 2009, I have served in 15 search committees for Assistant Professor, Full Professor or Research Engineer positions, in fields ranging from applied mathematics (CNU section 26), computer science (section 27), biology (sections 64 & 65) to neuroscience (section 69).
- PhD / HdR committees
 - HdR (Habilitation a diriger les recherches / Habilitation thesis) :
 - * N. Glade, Univ. Grenoble-Alpes, France, November 2022 (reviewer)
 - * J. Leroy-Dudal, Cergy-Pontoise University, France, February 2022 (examiner)
 - * J. Roux, Universite Cote d’Azur, Nice, France, September 2019 (reviewer)
 - * J.B. Masson, Sorbonne University, Pasteur Institute, Paris, France, May 2019 (reviewer)
 - * S. Bottani, Univ. Paris Diderot, November 2018 (reviewer)
 - * D. Martinez, Univ. de Lorraine, Nancy, March 2017 (reviewer)
 - * A. Stephanou, Univ. Grenoble, December 2011 (examiner)
 - PhD juries
 - * M. Davy, Univ. Montpellier, France, November 2023 (examiner)
 - * A. Poshtokhi, Univ. of Ulster, UK, June 2023 (reviewer)
 - * S. Abbara, Univ. Paris-Saclay, Pasteur Institute, France, October 2022 (reviewer)
 - * H. Verdier, Univ. Paris-Cité, Pasteur Institute, France, October 2022 (reviewer)
 - * R. Vuillaume, Univ. Bourgogne-Franche-Comté, December 2021 (reviewer)
 - * A. Douilet, Univ. Bretagne Ouest, September 2020 (chair)
 - * Y. Cui, Univ. Paris Descartes, December 2018 (reviewer)
 - * F. Oschmann, Technische Universität Berlin, Oct 2018 (reviewer).
 - * A. Mendes, Univ. P & M Curie, Paris, Sep 2017 (examiner).
 - * I. Djafer-Cherif, Univ. Paris-Saclay, Paris, July 2017 (reviewer).
 - * M. Potier, Univ. Paris-Est, Creteil, July 2017 (examiner).
 - * G. Rodriguez, Univ. P & M Curie, Paris, October 2016 (reviewer).
 - * A. Garnier, Univ. P & M Curie, Paris, December 2015 (examiner).
 - * N. Subramaniam, Tampere University of Technology, Finland, December 2015 (examiner)
 - * Z. Chaker, Univ. Paris Descartes, December 2014 (examiner)

- * V. Ady, Univ. Paris Descartes, November 2013 (reviewer)
- * G. Detorakis, Univ. Nancy, October, 2013 (reviewer)
- * M. Lefort, Univ. Nancy, July 04, 2012 (reviewer)
- * G. Corre, Ecole Pratique des Hautes Etudes, Paris, June 27, 2012 (reviewer)
- * H. Belmabrouk, Univ. Nancy, May 15, 2012 (reviewer)
- * R. Martinez, Univ. Lyon, September 26, 2011 (examiner).
- * L. Alecu, Uni. Nancy, June 30, 2011 (examiner)
- * A. Demarez, January 31, 2011, Univ. Paris Descartes (reviewer).
- * T. Girod, November 10, 2010, Univ. Nancy 1 (reviewer).
- * A. Coulon, July 01 2010 Univ. Lyon 1, 2010 (examiner).
- * M. Valvassori, July 10, 2009, Univ. Paris 8 (reviewer)
- * M. Ambard, June 08, 2009, Univ. Nancy 1 (reviewer)
- * J.-B. Rouquier, Dec. 08 2008, ENS Lyon (examiner)
- * David Meunier, Oct. 19, 2007, Université Lumière Lyon 2. (examiner).

- Editorial activities

- Editorial Board membership

- * Associate Editor for PLoS Computational Biology (2018-present)
- * Guest Editor for PLoS Computational Biology (2017-2018)

- Member of the Local Organization committee for Medinfo 2019 (<https://medinfo-lyon.org/>)
- Member of the Technical Program Committee for HPCS 2013 (<http://hpcs2013.cisedu.info>)
- Frequent reviewer for journals: PLoS Comput Biol, Scientific Reports, Bull Math Biol, PLoS One, Frontiers Synaptic Neuroscience, Frontiers Computational Neuroscience, J Theor Biol, Physical Biol, J Biol Physics, New J Physics...

- Expert for calls for funding or project selection:

- NC3R (UK National center for the Replacement, refinement and reduction of animal research), 2022
- NSERC (Natural Sciences and Engineering Research Council of Canada), 2022
- DFG (German central research funding organisation), 2021
- Wellcome Trust grants (UK charitable foundation for health research), 2021
- Emergence Call for Proposals 2021, Sorbonne Université
- AUF (Agence Universitaire de la Francophonie), programme mobilités doctorales 2020-2021
- BBSRC (UK non-medical bioscience public funding), 2020
- NSF (US National Science Foundation), call “Early-career Program”, 2016
- FNRS, Belgium, 2012-2017, 2019.
- FRC (Fond pour la Recherche sur le Cerveau) “Espoir en tête” 2016.
- Selection committee for the call “Systems Biology and cancer” of the “ITMO Cancer” from 2012 to 2015.
- COFECUB (France-Bresil cooperations), Campus France, 2011,
- DIM (Domaine d’interet majeur), Region Ile de France; 2011, 2018
- ANR (French National Research Agency) Calls “Générique” (2008, 2011, 2022) and “SysComm” (2008 & 2009),

4 Supervision of research activities

Together, I have (co)-supervised 2 software engineers, 2 postdoctoral researchers, 17 PhD students and 14 Master (M2) students. Unless otherwise indicated, all students listed below were full supervisions. For PhD students, I also indicate the funding source. Roughly half on them have taken jobs in private companies (that they have sometimes funded), and the other half opted for academia (doctoral, postdoctoral or permanent positions).

– Engineers / Software developers

- * **Nicolas Simon** (Software developer) - 2022- *Machine learning for drug discovery*. Funded by Inria via ADT “MLDD”.
- * **Magali Vangkeosay** (Software developer) - 10/2012 - 09/2014 - *Development of a software for automated quantitative analysis of time-lapse microscopy movies of growing bacterial populations*. Funded by Inria via ADT “Multi*Pop”. Magali is now R & D Engineer at Cosmo Tech, Lyon, France.

– Postdoctoral researchers

- * **Maurizio de Pitta**- 2013-2017 - *Understanding the functional relevance of neuron-astrocyte interactions in brain function*. Funded by the EU by an ERCIM grant followed by an IOF Marie Curie grant “Neuron-Astro-Nets” (collaboration with N. Brunel, Univ. Chicago). Maurizio now has his own lab in Toronto, Canada (<https://sites.google.com/site/mauriziodepitta/>).
- * **Pierre Gabriel**- 09/2011-08/2012 - *Mathematical modeling of protein aggregation and aging in E coli*. Funded by the French National Agency for Research (ANR), Project Pagdeg. Pierre is now an full professor in the Mathematics Department, University of Tours, France.

– PhD Students

- * **Andrea Ducos** - 2023 - *Partial differential equation discovery for spatio-temporal simulations in cells*. ED Info-Maths Lyon. Co-supervised (20%) with Audrey Denizot and Thomas Guyet (AIstroSight)
- * **Schayma Ben Marzougui-El Garrai** - 2023 - *Modelling compartmented second messenger networks in retinal growth cones*. ED Info-Maths Lyon, ANR grant (project SecNet). Co-supervised (50%) with Audrey Denizot (AIstroSight)
- * **Florian Dupeuble** - 2023- *Biophysical modeling of the neurovascular unit*. ED Info-Maths Lyon, Inria grant. Co-supervised (50%) with Audrey Denizot (AIstroSight).
- * **Arnaud Hubert** - 2022- *Modelling endocannabinoid-mediated synaptic plasticity and its implication in fast learning*. ED Info-Maths Lyon, ANR grant (project EngFlea).
- * **Hana Sebia** - 2022- *Optimal transport for comparison of semantic graph representation of care pathways - application to patient phenotyping*. ED Info-Maths Lyon. Co-supervised (50%) with Thomas Guyet (AIstroSight).
- * **Nathan Quiblier** - 2021- *Approximate Bayesian Computation for multimodal microscopy data: exploring the mobility of transcription factors in the nucleus of living cells*. ED Info-Maths Lyon, ANR grant (project ABC4M).
- * **Lisa Blum-Moyse** - 2020-2023, *Modelling the integration of synaptic activity by astrocytes*, ED Info-Maths Lyon, “Contrat Doctoral Normaliens” ENS Lyon. Defense Sep. 14, 2023.
- * **Audrey Denizot** - 2016-2019 : *Simulation of calcium signaling in fine astrocytic processes*, ED Info-Maths Lyon, “Contrat Doctoral Normaliens” ENS Lyon, co-supervised (50%) with Hédi Soula (CRC, Univ. P&M Curie, Paris). Defense Nov. 8, 2019. Audrey is now a postdoc in Japan, in Erik De Schutter’s lab, Okinawa Institute for Science and Technology.

- * **Marie Fernandez** - 2015-2017 : *Extraction and analysis of the acoustic network of social birds*, co-supervised (33%) with Hédi Soula (CRC, Univ. P&M Curie, Paris) and Clémentine Vignal (Univ. J. Monnet, Saint-Etienne). Defense April 9, 2017. ED Info-Maths Lyon, Bourse région Rhône-Alpes. Marie has started a permaculture consulting firm in southern France.
- * **Alexandre Foncelle** - 2014-2017 : *Data-driven computational modelling for some of the implications of dopamine in the brain: from subcellular signalling to area networks*, Defense April 5, 2017. ED Info-Maths Lyon, ANR grant (project Dopaciumcity). Alex is now an INSERM research Engineer with Lyon Neuroscience Research Center (CRNL).
- * **Alvaro Mateos Gonzalez**- 2014-2017: *Asymptotic analysis of partial differential equations arising in biological processes of anomalous diffusion.*, co-supervised (30%) with Vincent Calvez (EPI Numed) and Thomas Lepoutre (EPI Dracula), Defense: September 22, 2017. ED Info-Maths Lyon, “Contrat Doctoral Normaliens” ENS Lyon. Alvaro holds a postdoc position in Mathematics at the University of Montpellier, France.
- * **Ilya Prokin** - 2013-2016 : *Modeling and simulation of signal transduction in living cells: synaptic plasticity of basal ganglia neurons*, Defense: December 02, 2016, ED Info-Maths Lyon, Inria grant. Ilya is Lead Data Scientist at LoanSnap, an US fintech startup.
- * **Jules Lallouette** - 2011-2014 : *Modélisation des réponses calciques de réseaux d’astrocytes: relation entre topologie et dynamiques*, Defense: December 04, 2014. ED Info-Maths Lyon, MESR grant. Jules is now postdoc in Erik De Schutter’s lab, Okinawa Institute for Science and Technology, Japan.
- * **Anne-Sophie Coquel** - 2009-2012 - Co-Supervised (50%) with A. Lindner (INSERM U1001, Cochin Medical School, Paris, France). *Deciphering the molecular mechanisms underlying the role of protein aggregation in aging of E. coli*. Defense: November 16, 2012. ED Info-Maths Lyon. Inria Grant to AEN (Action d’Envergure Nationale) Co-lage. Anne-Sophie is now Head of Genomics at Sanofi, Vitry-sur-Seine, France.
- * **Fei Jiang** - 2006-2009 - Inria Saclay & Orsay University. Co-Supervised (40%) with M. Schoenauer (TAO, Inria, Saclay, France). *Evolution and optimization of large neural networks*. Defense: December 16, 2009. Inria Grant. Sadly, I don’t have much contact with Fei anymore.
- * **Benoit Siri**- 2005-2008 - Inria Saclay & Orsay University, *Topology-dynamics-learning interactions in complex bioinspired neural networks*, Defense: December 18th, 2008. Ph.D. funded by a grant by the French National Agency for Research (ANR) (Call JC/JC, Project ASTICO). Benoit is now R&D engineer at Henix, Paris.
- * **Delphine Pellenc**- 2002-2005 - Université de Cergy-Pontoise- Co-Supervision (50 %) with O. Gallet, *Adsorption-induced fibronectin self-assembling: experimental characterization on hydroxyapatite and study by numerical simulation*. Defense: October 21st, 2005. MESR Grant. Delphine is now Head of Physics at St Joseph’s College, Reading, UK

– Master students

- * **Nathan Quiblier** (Sorbonne Université, M2 Mathématiques de la Modélisation) April-September 2021, *Stochastic modelling and simulations of transcription factors in the nucleus*. Nathan started a PhD with me.
- * **Lisa Blum-Moyse** (ENS Lyon, M2 Physics) February-June 2020, *Modelling the modulation of cortical on-off state switching by astrocytes*. Lisa started a PhD with me.
- * **Tymofii Prokopenko** (ENS Lyon, M2 Computer Science) February-June 2019, co-supervised with Olivier Pascual (Institut NeuroMyoGene INSERM, Lyon) and Christophe

- Rigotti (Inria Beagle), *Classification of the activity of microglia across vigilance states: a data mining approach.*
- * **Carlos Vivar-Rios** (Erasmus+ master internship) March-July 2017, co-supervised (50%) with Audrey Denizot, *Spatial stochastic simulations of calcium waves in astrocytes*. Carlos is now PhD student in A. Volterra's lab, University Lausanne, Switzerland.
 - * **Audrey Denizot** (Master 2 Bioscience, ENS Lyon) September-December 2015, *Multiscale simulations of Ca waves dynamics in fine astrocytic processes*. Audrey did her PhD with me.
 - * **Raphael Bournhonesque** (Master 2 Computer Science, ENS Lyon) February-June 2015, *Role of glutamate transporter diffusion in glutamate clearance*. Raphael is now a datascientist with Wuha.
 - * **Alvaro Mateos Gonzalez** (Master 2 Mathematics, ENS Lyon) March-June 2014, co-supervised (30%) with Vincent Calvez (EPI Numed) *Anomalous subdiffusion equations as diffusion limits to integro PDEs with age structure*. Alvaro started a PhD with me (co-supervision).
 - * **Osama Khalil** (Master in Medicine, Univ. of Cairo, Egypt) - Feb-May - 2013 - *Computational systems biology of signal transduction in living cells: synaptic plasticity of striatum neurons*. EGIDE grant. After a PhD at Ohio State University, USA, Osama is now a postdoc at the Mathematics department of the University of Utah.
 - * **Amanda Lo Van** (Master 2 IADE, Lyon, now a PhD Student, Carmen, Lyon, France) - Feb-June 2013 - *Individual-based modeling of simple genetic circuits*. After a postdoc at the Italian Institute for Technology, Genova, Italy, Amanda is now an assistant professor at Insa Lyon, France.
 - * **Jean-Marie Gomes** (Master 2, Computer Science, ENS Lyon) - Feb-June - 2011 - *The bidirectional response of cortico-striatal synapses to 2-arachidonyl-glycerol*. Jean-Marie did his PhD with A. Destexhe's lab, Gif-sur-Yvette, France.
 - * **Jules Lallouette** (Master 2 IADE, Lyon) - Feb-June 2011 : *Transport in complex networks: the case of mixed neuron/glial cell networks*. Jules did his PhD with me.
 - * **Zayna Chaker** (Master 2 AIV, Univ. Paris 5 Descartes), April-July 2010 - *Protein aggregation underlying bacterial aging : Computer simulations*. Zayna is now a postdoc at Biozentrum, Univ. Basel, Switzerland.
 - * **Edouard Garnier de Labareyre** (Ecole polytechnique, Internship, co-supervised (50%) with O. Temam, Alchemy, Inria Saclay) - April-July 2008 - *Emergence of computation and abstraction functions on biological neural networks*. Edouard is founder and CTO of PPE analytics.
 - * **Geoffrey Caron-Lormier** (Master 2) - September 2001-July 2002 - Université de Cergy-Pontoise, *Biomathematics of the early steps of integrin signaling pathway: FAK and Src auto- and co-activation*. Geoffrey is a researcher at Rothamsted Research, UK

5 Grants / Management

I distinguish below between the research projects I am supervising or have supervised from those for which I have been a partner, but not supervisor.

- Grants as supervisor
 - **ABC4M**, 2020-, grant ANR-20-CE45-0023-01, Approximate Bayesian computation-driven multimodal microscopy to explore the nuclear mobility of transcription factors, a project funded by the French National Agency for Research (ANR), Call “AAP2020”.
 - * We combine computer simulations and Approximate Bayesian computation with simultaneous multiple microscopy methods (FCS and spt-PALM) to quantify the way transcription factors explore the nucleus to find their binding sites
 - * I am supervising the project. Other participants are Institut Langevin, ESPCI, Paris (I. Izeddin), Phlam laboratory, Lille (L. Héliot) and Univ. Berkeley, CA, USA (X. Darzacq).
 - * Total amount funded: 565 k€.
 - **Neuron-Astro-Nets**: 2013-2017, Marie-Curie International Outgoing Fellowship (IOF) grant from EU FP7.
 - * This project aimed at developing a new model of synaptic plasticity that takes into account astrocyte signaling, its extension to astrocytes-synapse biochemical interactions in ensembles of synapses enwrapped by the same astrocyte and, eventually, to the firing of a single neuron or networks.
 - * I was coordinator of the project. Nicolas Brunel (University of Chicago, Dept Statistics and Neurobiology) was the other participant.
 - * The project has funded Maurizio De Pittá’s postdoc for 4 years (June 2013- May 2017). M. De Pittá first spent one year in Beagle, Lyon funded by an EU ERCIM grant (06/2013-05/2014) then two years in N. Brunel’s group in Chicago (06/2014-05/2016) and one year back in Beagle in Lyon (06/2016-05/2017). The IOF grant funded the last three years.
 - * Total amount funded: 270 k€.
 - **MultiPop**: 2012-2014, an ADT funded by Inria’s Technological Development Department D2T.
 - * The objective was to develop a new software for automated quantification of bacterial cells in microscopy movies, in collaboration with INSERM U1001 and Paris 5 MAP (Applied Mathematics) Labs. The mathematical and methodological aspects at the basis of the software had already been laid out during A-S Coquel’s PhD (defended in 2012, co-supervised with A. Lindner, INSERM U1001).
 - * Total amount funded : 200 k€.
 - **Astrocytic regulation of neuronal network activity**: 2012-2013, a Research Networks Program of the High Council for Scientific and Technological Cooperation between France-Israel, with groups from Tel Aviv University.
 - * The specific objectives of this project were to determine the properties of astrocytic calcium wave propagation and to reveal how astrocyte signals dynamically affect synaptic information transfer, thus regulating neuronal network activity. To this aim, we combined theoretical and experimental investigations of small neuron-glia networks.
 - * I was coordinator of the project for the French side and supervised the modeling aspects. The coordinator for the Israeli group was Pr. Y. Hanein (Tel Aviv University Institute for Nanoscience and Nanotechnology, nano.tau.ac.il/hanein), who was responsible for

the experimental parts. The other partner was Pr. E. Ben-Jacob (School of Physics and Astronomy, Tel Aviv University, tamar.tau.ac.il/~eshel/EBJG/). The project also gathered 4 PhD or Master students in Tel Aviv and Lyon.

* Total amount funded : 160 k€.

– **ColAge**: 2008-2012, an Inria AEN (“Action d’Envergure Nationale”) project on modeling and simulation of systems biology.

* We have searched for natural and engineering solutions to the control of bacterial growth and aging using both systems biology and synthetic biology approaches. Our main strategy was to leverage synergies resulting from day-to-day collaborations between computer scientists and cell biologists

* I have supervised the project. Other participants were INSERM U1001 Paris, LAPM Lab CNRS Grenoble, EPI Ibis Grenoble, EPI Biocore Sophia and EPI Contraintes Rocquencourt.

* Over the 4 years, ColAge has gathered more than 20 members (14 permanent researchers, 3 postdocs and 4 PhD students), led directly to the publications of > 25 peer-reviewed articles and was at the origin of 3 closely related research projects funded by the ANR or Inria.

* website (incl. publication list): colage.saclay.inria.fr

* Total amount funded: 626 k€.

– **ASTICO**, 2005-2008, grant ANR-05-JCJC-0128, Apprentissage dans les SysTemes biologiques COmplexes / Learning in complex biological systems, a project funded by the French National Agency for Research (ANR), Call “Jeunes Chercheurs” / Young Researchers.

* Our goal was to investigate how the structure complexity in complex biological neural networks conditions their functional capacities, and more specifically, their learning characteristics.

* I have supervised this project. Other participants were Non Linear Institute, UMR 6618 CNRS, Nice; ANIM, U742 INSERM/UPMC, Paris and ETIS, UMR 8051 CNRS, Cergy-Pontoise (total 5 permanent researchers).

* The project funded B. Siri’s PhD and directly led to the publications of 7 peer-reviewed articles (journals and conferences).

* Total amount funded: 110 k€.

- Grants as partner

– “SecNet” (Spatio-temporal dynamics of second messenger networks), 2023- ANR-22-CE16-0034-02, Call AAPG ANR 2022. Supervisor: X. Nicol (Vision Institute, Paris). Total amount funded: 533 k€.

– “EngFlea” (Engram of fast learning in the striatum), 2022- grant ANR-21-CE16-0022-02, Call AAPG ANR 2021. Supervisor: L. Venance (CIRB, Collège de France, Paris). Total amount funded: 630 k€.

– “Dallish” (Data Assimilation and Lattice LIght SHEet imaging for endocytosis/exocytosis pathway modeling in the whole cell), Call AAPG ANR 2016 (2016-2020). Supervisor: C. Kervrann (Inria Rennes). Other participants: J. Salamero (Institute Curie, Paris) and B. Laroche (INRA, Jouy-en-Josas). Total amount funded: 440 k€.

– “Dopaciumcity” (Dopamine modulation of calcium influx underlying synaptic plasticity): ANR-14-NEUC-0003, a 4-year project (2014-2018) funded by a grant from the ANR-NSF-NIH Call for French-US Projects in Computational Neuroscience. With L. Venance, College de France, CIRB, CNRS/UMR 7241 - INSERM U1050, Paris, France and Kim Blackwell,

Krasnow Institute of Advanced Studies, George Mason University, Fairfax, VA, USA. Supervisor: L. Venance (for France) and K.L. Blackwell (for US) . Total amount funded: 880 k€.

- “PAGDEG” (Causes and consequences of protein aggregation in cellular degeneration): grant ANR-09-PIRI-0030, a three-year project (2009-2012) funded by the French National Agency for Research (ANR), Call “PIRIBIO” - Programme interdisciplinaire de recherches sur les systèmes moléculaires et cellulaires, et d’innovation biomédicale. Supervisor: A. Lindner (INSERM, Paris) ; Other participants: Y. Chen (ENS Paris), L. Moisan (Univ. Paris 5). Total amount funded: 450 k€.
- “NeoBG” (towards a biologically realistic theory of reinforcement learning), 2011-2012, Appel Projets exploratoires pluridisciplinaires inter-instituts (PEPII) CNRS - Supervisor : B. Delord (Univ. P & M Curie, Paris). With Ph. Faure and L. Venance (College de France, Paris). Total amount funded : 24 k€.
- “RASMOT”: A one year (2010) research project funded by the call “Programme interdisciplinaire CNRS Neuro-IC : Neurosciences et neuroinformatique computationnelle”. Supervisor: E. Guigon (ISIR, CNRS, Univ. P&M Curie Paris). Total amount funded : 24 k€.
- “AMYBIA” (Aggregating Myriads of Bio-Inspired Agents); a two-year project (2008-2009) funded by an Inria ARC (Collaborative Research Initiative). Supervisor: N. Fatès (Project-Team MAIA, Inria Nancy-Lorraine); Other participants: B. Girau (Project-Team Cortex, Inria Nancy-Lorraine). Total amount funded : 24 k€.
- “MACACC” (Modeling cortical activity and analysis of the cerebral code); a two-year project (2008-2009) funded by an Inria ARC (Collaborative Research Initiative). Supervisor: B. Cessac (Institut Non-Linéaire de Nice and Project-Team Odyssee, Inria Nice); Other participants: EPI Odyssee, Inria Nice), Cortex, Inria Nancy, Mediterranean Institute for Cognitive Neuroscience, Marseille, Lab. J.A. Dieudonné, Lab. Neurobiology, Univ. Nice. Total amount funded: 66 k€.

6 Prizes and awards

- Recipient of the “RIPEC C3” individual bonus for both pedagogical investment, scientific activity, and tasks of general interest, 2023-2025.
- Elected Full Member, Sigma Xi: The Scientific Research Honor Society, 2021-2022
- Conference Fellowship of the United Engineering Foundation (Mount Vernon, VA, USA), 1998.

7 Teaching

Almost all my teaching dates back from my years as a PhD student in Univ Technology Compiegne (1996-1999) and an assistant professor in the University of Cergy Pontoise (1999-2004). Since my hiring at Inria, I have been teaching approx. 10 hours per year at Master levels (at INSA Lyon and ENS Lyon). The topics of these lectures concerns diffusion and reaction in intracellular environments.

- Total: 1000 hours (eq. TD)
- Level: from L2 to M2
- Main Subjects:
 - Computer programming basics for biologists (L2)
 - Biochemistry/Metabolism (L2)

- Enzyme kinetics (L2 & L3)
- Biomathematics and modeling (L3)
- Biophysics: Neutron and light scattering (M1)
- Protein/Ligand interactions (M1)
- Diffusion and reaction in intracellular environments (M2)

8 Dissemination of scientific knowledge

- “Le mouvement est devenu massif,” an interview to the French journal L’Usine Nouvelle, Special Edition “A year of simulation”, number 3608, April 25, 2019.
- Interview for a news of the Journal “Biotechniques” <http://www.biotechniques.com/news/Floating-in-a-Sea-biotechniques-350103.html>
- “Inria - Alan Turing aurait 100 ans : témoignage”, a 2 min interview on Turing’s 1952 paper on chemical morphogenesis (in french). www.youtube.com/watch?v=3HQH9irJZ24
- “Alan Turing : l’étrange origine des formes” (short paper for A. Turing centenary), with C. Castro, on Inria’s web site, June 2012
www.inria.fr/actualite/le-saviez-vous/alan-turing-l-etrange-origine-des-formes.
- “Du chaos dans les neurones” (chaos in neurons), with B. Cessac, *Pour La Science*, Nov. 2009, 385:108-115 (in french). Also an online article on the *Ji(nterstices* web journal (interstices.info/chaosneurones).
- “Quand les bactéries se mêlent du calcul des ordinateurs...” (about bacteria and computer calculations) : a short vulgarization text plus a longer podcast on the *Ji(nterstices* web journal (interstices.info/jcms/c_40644/).
- “Alchimistes de l’informatique” (computer alchemists), *La Recherche*, may 2008.
- “Why computers are like the weather”, *NewScientist*, July 2005. A comment on our paper : Berry, Graia Perez and Temam (2006) Chaos in computer performance. *CHAOS*, 16:013110.

9 Technology development : software or other realization

9.1 Software development

Between 2012-2016, I have supervised the development of a software called “FluoBacTracker” as part of the Inria-funded (ADT) project “Multipop”. FluoBacTracker was an integrated software tool to identify and track bacterial cells and their lineages throughout microscopy "movies" (time lapse microscopy). I have been supervisor of the ADT and head of the Steering Committee. I supervised and ratified all the design and architectural choices. Moreover I have served as a day-to-day technical support to the developers for basic questions on the biological aspects. The development of FluoBacTracker has been crucial for the PhD of Anne-Sophie Coquel but the software has also been used by a couple of other academic labs.

9.2 Technology transfer

I am co-owner of Patent FR2937762, together with O. Temam and S. Yehia. The patent is an extension of our results published in the conference HPCA 2009 (Yehia et al., 2009) on the conception of specialized hardware accelerators to speedup the execution of parts (loops) of a program. This patent is co-owned by INRIA and Thalès (where S. Yehia was working at the time, he is now with Intel Portland) and registered in France only (Thalès decided not to extend it to international in 2011). My contribution has mainly consisted in writing a C++ code to fuse the individual circuits into a single compound one that minimizes the total cost using evolutionary strategy.

10 Publications

10.1 Articles & Conference Proceedings

Article type	# articles
Books	2
Book Chapters	10
Peer-Reviewed Journals	61
Peer-Reviewed Internatl. Conferences	25
Peer-Reviewed Workshops & Abstracts	12
Patents	1

A note on the order of the authors in my field: The first or the first two authors are usually the ones who produced the results (“junior authors”), while the last or two last ones are the “leading” supervisors. However, when publishing a collaboration work between experimentalists and theoreticians, determining the authors’ positions is a bit more delicate. There is no real "leading" author because both approaches were equally important for getting the results published. That is why we are often second or second last author.

Hugues BERRY
